PROFESSIONAL SUMMARY

Data Science & AI Engineering student with a focus on high-impact data analysis and scalable automation. Experienced in optimizing Large Language Models (LLMs) through human-aligned data frameworks, high-fidelity prompt design, and RLHF workflows. Expertise in Python, SQL, and BI platforms with a deep understanding of the end-to-end data lifecycle.

TECHNICAL SKILLS

- **AI & LLM Optimization:** Prompt Engineering, Human Alignment (RLHF), SFT Dataset Curation, Model Evaluation
- **Languages:** Python (NumPy, Pandas, Scikit-learn), SQL (PostgreSQL, MySQL), Java, C++
- **Data Analytics:** Exploratory Data Analysis (EDA), Statistical Testing, Feature Engineering, ETL Pipelines
- **BI & Visualization:** Tableau, Power BI, IBM Cognos, Advanced Excel (Pivot Tables, Macros)
- **Machine Learning:** YOLOV5, CNNs, Computer Vision (OpenCV, MediaPipe)
- **DevOps & Cloud:** AWS Fundamentals, Docker, Git/GitHub, CI/CD Fundamentals

EXPERIENCE

Ethara AI (Green Rider Technology LLP)

Feb 2026 – June 2026

LLM Post Training Intern

Gurugram, India (Remote)

- Curated high-fidelity prompt-response datasets for **Supervised Fine-Tuning (SFT)** to enhance model reasoning, instruction-following, and domain-specific accuracy for frontier AI labs.
- Executed **Reinforcement Learning from Human Feedback (RLHF)** workflows, providing expert rankings to align model outputs with human intent, safety standards, and helpfulness.
- Benchmarked model performance and refined prompt templates to mitigate hallucinations and improve response consistency through "Human-in-the-loop" (HITL) pipelines.
- Collaborated on defining ground-truth standards and labeling taxonomies for the optimization of Large Language Models.

EDUCATION

Sanjivani University

2024 – 2028

Bachelor of Technology - Artificial Intelligence & Data Science

Kopergaon, India

- **CGPA:** 7.91 / 10.0
- **Relevant Coursework:** Probability & Statistics, Data Structures, Database Management, Machine Learning.

TECHNICAL PROJECTS

Intelligent Surveillance & Night Patrolling Drone (Advanced Research)

- **Architecture:** Designed a 40+ page technical framework for an autonomous drone system utilizing YOLOv5 for real-time threat detection and autonomous navigation logic.
- **Model Evaluation:** Conducted a theoretical performance analysis of object detection models for night-vision environments.

Government-Scale Data Analysis (UIDAI Aadhaar Hackathon Entry)

- **Data Engineering:** Processed and cleaned large-scale UIDAI datasets using Python to prepare for statistical modeling.
- **Impact:** Developed automated reporting dashboards to translate complex data into actionable policy insights.

AI Sign Language Interpreter & Gesture HCI Suite

- **Development:** Built a real-time computer vision system using CNNs to translate hand gestures into text and speech with 98% accuracy.

MeetMate - AI-Powered Productivity Pipeline

- **Systems Design:** Built a full-stack data pipeline using Whisper AI and Gemini API to convert meeting audio/video into structured actionable insights.

RESEARCH & ACHIEVEMENTS

- **Published Research:** "Digital Immortality: Preserving Human Consciousness through AI," JETIR Journal.
- **Scholarship:** Awarded Merit-based scholarship by Sanjivani University for academic excellence.
- **Open Source:** Active contributor to AI and data science repositories on GitHub.
